Subject: Get your data lists ready!

As you know, the NADSD team is in the process of trying to get everyone who wishes to be a data provider registered (see <http://www.tapr.org/directory> for info and to register). Within a week we will contact those who have registered and provide info about how to FTP your files to us.

There are three things you need to do:

- 1.. If you haven't registered and want to be a data provider, sign up now!
2. Get your files ready. See <http://www.tapr.org/directory> for details on file format.
3. Check the list that follows - this is the list of data providers that I know about. If you have registered and aren't listed here, please advise me ASAP (WA0CQG@TAPR.ORG).

R Jim Ketcham KA4AFI

Hi Dave -

It looks like you never formally registered on the TAPR page
(<http://www.tapr.org/directory>)

What you gave us was the info for the initial people interested in forming
the NADSD group. I sent a message asking everyone to register using the web
page sign-up but must have missed you. Sorry.

When you register IDEA, I will get a copy automatically and add that info to
the "official" list which we will use to notify folks when we are ready for
them to FTP their data to us. As my note on the regional_freq reflector
said, we are getting close to opening the floodgates.

Subject: Get ready

Hello folks -

Some things have become clear in the messages I have gotten from some of you in the last few days concerning the North American Digital Service Directory (NADSD). I would like to share some thoughts with all of you.

1. Do NOT send me your lists. Hold them until you get an email from me which will give the FTP address and directory to use. Lists sent to me now waste your efforts.
2. If you want to be a data submitter for the NADSD, you need to register at the TAPR url: <http://www.tapr.org/directory/partrequest.html>
If you haven't registered, even though you and I may have exchanged email, please do so now.
3. Remember that whatever you send in your list WILL be published! So if you don't want lat/long or backbone frequencies listed, don't send that info.
4. We prefer, when possible, that individuals to do send me or the FTP site info - but rather, that they work with Regional Groups. Should this not be an option, we will accept data from individuals.
5. The first edition of the NADSD may have duplicate listings because there were two submitters sending the same data. That's OK - we will get rid of the dupes later - better to have a few dupes rather than miss something.
6. We badly need data providers for:
ALASKA
HAWAII
IDAHO
KENTUCKY
LOUISIANA
MASSACHUSETTS
MISSISSIPPI
MONTANA
NEBRASKA
NEVADA
NEW YORK
NORTH DAKOTA
OKLAHOMA
OREGON
PENNSYLVANIA (ALL EXCEPT WESTERN AND CENTER CITY PHILADELPHIA))
RHODE ISLAND
TENNESSEE
UTAH
VERMONT
VIRGINIA (ALL EXCEPT NORTHERN)
WYOMING

7. All digital communications services (excluding personal mail drops) should be listed in the NADSD.

Subject: Registering as NADSD provider

We are nearing the time when we will notify everyone who has registered and been accepted as a provider of data for the North American Data Services Directory. Only these people will be notified when we are ready for them to FTP their files to us. If you wish to provide data for the NADSD and haven't registered at url:
<http://www.tapr.org/directory> please do so ASAP - time is running out.

Subject: NADSD status - 2/27/97

A number of you have inquired as to why you haven't heard anything from the NADSD Team. The following is part of a reply I made to one such inquiry and I want to share it with you in case you have concerns

Why haven't you heard anything? Simple. The NADSD team is busy making good things happen behind the scenes right now.. Be assured that if you have registered as a NADSD data provider, you will get an e-mail with the FTP instructions, directory name and password when we are ready to have you send your data. We are not ready for that yet and are still registering data providers. At this moment there are 64 registered data providers.

The task of the TAPR NADSD team is to build a fully automated system that will accept your data and put it in an organized list for all to see. When TAPR and ARRL made the joint announcement around the 1st of December, we knew how to set up such a system but hadn't actually created it. Prior to the ARRL decision made on November 18th, there was no need for TAPR to have such a system.

Now, we are very close. The on-line pages are done. Nine test files for a few areas have been uploaded to test the data display - and that works. What our software guys are wrestling with is the system using FTP that allows you to upload anytime to your own dedicated directory that only you have access to and is password protected. By doing it this way, no one has to go through your stuff and do anything. That makes YOU responsible for it. But that also makes more work now. Eight weeks after we agreed to do this job, we are almost ready to say "SEND" to everyone.

I sure hope you and everyone else aren't waiting to prepare your data until they get the message to "send" from us because we hope everyone has used the time to prepare their lists and they are ready to go. Why??? Because the TAPR CD-ROM goes to press in 4 weeks and we have room blocked out in it for the NADSD. Missing this opportunity means we wait a year. And we don't want to do that.

Remember, please, that there may be duplication of listings - particularly in this first list. And that is ok. We hope that the contributors of duplicate data will work among themselves to determine whose data will be removed and whose will remain. I want to restate here that TAPR does not endorse anyone or any group as the official representative for a particular area - we are solely interested only in providing accurate listing of Digital Systems in North America.

If you want a sneak preview of how the data will look check out url: <http://www.tapr.org/directory> and look at the listings for Maine, Quebec, Florida, S. Nevada, or Minnesota. These are a few we manually loaded to test with.

Thanks for your understanding and support,

Carl WA0CQG

Carl,

I would like to introduce NESMC as the data submitter for Maine, New Hampshire, Massachusetts, and Rhode Island.

Specifically, data for listing will come from:

6m: Alan Tasker, WA1NYR
2m: Bob Skinner, WA1YEG
220MHz: Tom Greenwood, N1JQB
440MHz: John Brunelle, KA1FYB
900MHz+: Lewis D. Collins, W1GXT

You may contact me with any problems.
I will keep you posted with changes.

Thanks,
Ken Chilton, KA1TIH
NESMC NFCC Representative

Hi Ken -

Thanks for your note and willingness to provide data for Maine, New Hampshire, Massachusetts and Rhode Island. There are several data contributors registered for these areas who have indicated they will supply data for the same areas. I am including a list of these individuals/organizations and their e-mail addresses so you can coordinate with them to eliminate potential overlap. They are receiving a copy of this note too.

Tom Frenaye K1KI

Carlisle, MA 01741
netcpa@gw.ri.ultranet.com

ARRL MAINE
ME (A list in electronic format sent to ARRL - on NADSD now)

R Burt Lang VE2BMQ
ME, NH, MA, VT, Partial NY, QUE (SW QC), ON (East)
ve2bmq@amsat.org
North East Digital Association (NEDA)
POB 563
Manchester, NH 03105-0563
ve2bmq@amsat.org
NEDA Report

It is important that you visit the web site and register as a data provider.

Thanks for your interest!

Best wishes,

Carl WA0CQG
